Education

Illinois State University
Majors: Finance & Business Administration

Graduated: December 2014

Work Experience

01/2022-present

Redwood Logistics

Application Support Engineer

- Provides technical support for a variety of internal and external applications. Including TMS systems, data integration / transformation systems, and exchange between internal platforms and a variety of vendors.
- Documents current processes, procedures, and routing guidelines.
- Works daily with and maintains relationships with business users, vendors, developers, and infrastructure team.

U.S. Bank

12/2018-12/2021

Business Ops Analyst

- Designed, developed, and implemented operational and accounting reports using IBM Cognos analytics.
- Worked with internal and external users to automate processes. Including reporting, business rules, GL coding, MS Access Databases, and EDI invoicing.
- Acts as a point of contact in research and troubleshooting of EDI, CSV flat file, and text file failures. Additionally worked as a point of contact in the implementation and testing of new carrier setups.

Tranzact Technologies

12/2016-12/2018

Transportation Audit Analyst

- Used knowledge of industry to define problems, collect data, establish facts, and draw valid conclusions. Analyzed results at a micro and macro level.

Project

Trucking Mileage GUI

<https://github.com/smsmit40/MileageGUI>

- Desktop application using Python, Tkinter, and Requests. The user enters in two zip codes and receives City/State information for both as well as the truckload mileage.
- This application is pulling data back from the Bing Distance API using the Truckload mileage settings.
